

CS: Lagged for S23, argument

The diagram illustrates a complex network of relationships between various personality traits. The nodes are circles of different shades of purple and white, connected by numerous arrows of varying thickness and style (solid, dashed, curved). The traits include: responsible, emotional volatility, energy, creative imagination, respect, organized, assertive, compassion, sociability, depressed, productive, angry, trust, anxious, argument, intellectual curiosity, and aesthetic sensitivity. The 'argument' node is central and white, while others are in various shades of purple.

A network diagram illustrating the relationships between 15 personality traits. The traits are arranged in a circular layout, and their connections are represented by lines of varying thickness and style (solid vs. dashed). The traits are:

- emotional volatility
- sociability
- anxious
- depressed
- organized
- assertive
- energy
- creative imagination
- intellectual curiosity
- trust
- compassion
- argument
- respect
- aesthetic sensitivity
- productive

The diagram shows a complex web of interconnections, with some traits (like 'angry' and 'intellectual curiosity') appearing to be central nodes with many connections. The lines represent different types of relationships, with solid lines indicating stronger or more direct connections and dashed lines indicating weaker or more indirect ones.
