

CS: Lagged for S166, sick

The diagram illustrates a network of 15 personality traits: assertive, depressed, trust, emotional volatility, anxious, aesthetic sensitivity, respect, productive, creative imagination, energy, organized, intellectual curiosity, sociability, angry, and responsible. The 'sick' node is highlighted in white. The network is characterized by numerous directed edges, with solid purple arrows representing primary relationships and dashed light purple arrows representing secondary or lagged effects. The 'sick' node is highly central, with many incoming and outgoing connections. Other nodes like 'trust' and 'sociability' also show high connectivity. The overall structure suggests a complex interplay of these traits, with the 'sick' state acting as a central hub.

The diagram illustrates a network of personality traits. The central node is 'sick' (white circle). Other nodes include 'assertive', 'respect', 'aesthetic sensitivity', 'compassion', 'intellectual curiosity', 'depressed', 'angry', 'productive', 'energy', 'responsible', 'emotional volatility', 'trust', 'anxious', and 'creative imagination'. Nodes are connected by solid and dashed lines, with 'sick' having the most connections.
