

CS: Lagged for S136, argument

The diagram illustrates a network of relationships between 14 variables, represented by circles. The variables are: respect, responsible, creative imagination, energy, emotional volatility, angry, depressed, intellectual curiosity, aesthetic sensitivity, productive, anxious, compassion, trust, assertive, organized, sociability, and argument. The relationships are indicated by arrows: solid arrows with curved heads represent significant paths, while dashed arrows with curved heads represent non-significant paths. The 'argument' variable is shown in a white circle, indicating it is the reference variable. The 'anxious' variable is shown in a light purple circle, indicating it is the variable being lagged. The 'respect' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'angry' variable is shown in a light purple circle, indicating it is the variable being compared to the lagged variable. The 'productive' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'assertive' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'organized' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'sociability' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'compassion' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'trust' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'aesthetic sensitivity' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'intellectual curiosity' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'depressed' variable is shown in a light purple circle, indicating it is the variable being compared to the lagged variable. The 'emotional volatility' variable is shown in a light purple circle, indicating it is the variable being compared to the lagged variable. The 'creative imagination' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'responsible' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable. The 'energy' variable is shown in a dark purple circle, indicating it is the variable being compared to the lagged variable.

A circular diagram illustrating 14 personality traits arranged in a circle. The traits are color-coded: purple for positive traits, light blue for negative traits, and white for neutral traits. The traits are: argument, energy, responsible, compassion, anxious, emotional volatility, creative imagination, productive, sociability, trust, depressed, aesthetic sensitivity, intellectual curiosity, angry, and respect.
