

CS: Lagged for S72, sick

The diagram illustrates a network of 15 personality traits, each represented by a circle. The nodes are interconnected by arrows, indicating correlations. Solid purple arrows represent significant correlations, while dashed grey arrows represent non-significant correlations. The traits are arranged in a circular pattern, with some traits having multiple significant correlations. The traits include: depressed, organized, emotional volatility, aesthetic sensitivity, creative imagination, responsible, compassion, respect, anxious, angry, sociability, intellectual curiosity, sick, energy, productive, and assertive. The 'sick' node is white, while others are purple. The diagram shows a dense web of connections, with many traits having multiple significant correlations.
